

Our History

In our world, there are not much platforms available where the people who are physically handicapped can come together and interact with each other and possibly tie the knot of a beautiful relation that we term as MARRIAGE.

So, we, students of Delhi University saw this as a hole in our society. So, through this website, we intend to fill this gap and make the necessary move in helping the desired people.

About Us

SPECIAL VIVAH is a matrimonial website specially designed for physically handicapped people in the world.

Company Website Here

Future of Special Vivah

As the desired target group is the handicapped people of our society, in the future we intend to make it a full fledged matrimonial website where normal people can also come and interact.

The difference in other websites and ours would be that our main focus is the handicapped people unlike any other matrimonial website.

Our Outreach

Initially it will be at a state level, but with time, we will be reaching to national level and then international level.
